Important Notice About Your Water Bill

The West Boylston Water District has implemented the final phase of the new water rate system effective on April 1, 2007. This new structure will decrease the gallons within the blocks that the rates are based on. The **new** rates for this system are listed below in **bold** print. This is the third and final phase of a three phase program.

The Board of Water Commissioners implemented this final phase on March 21, 2006 after a complete water rate study that projected the revenues that will be needed for many current and future water system capital improvements and upgrades.

With this new rate the average **quarterly** bill will range from **\$36** for customers using less than **6,250** gallons, **\$56** for customers using less than **12,500** gallons and **\$105** for customers using less than **25,000** gallons. For customers using **over 25,000** gallons the average **quarterly** bill could be as high as **\$378**. Many of these accounts will be encouraged to improve their water conservation efforts in order to drop into a lower category. For conservation tips go to www.westboylstonwater.org/conservation.htm.

The new rates will become effective starting with the April 1, 2007 billing period.

**NOTICE
